

HOW GUGGENHEIM SEES COPPER MARKET

European Supply Only Normal; Prices Controlled By Supply on Hand.

Special to The Tribune.

BOSTON, Nov. 13.—Daniel Guggenheim, who has just returned from abroad, says:

"A supply of one hundred thousand tons of copper in Europe today is nothing more than normal, as we have been shipping copper steadily for two years. All copper there is in licensed warehouses. There is no excessive supply. The supply has been exaggerated so as to keep prices down, that European dealers may pay as little as possible for fresh shipments from this side, in view of the present rate of production in this country."

"Market price of original shipments of copper is controlled by the supply on hand, and in that the commodity of copper is in a class by itself. If the stock of a silk manufacturer, for instance, begins to accumulate to large proportions, he can cut down or stop manufacturing for a time, and thus control supply without affecting the price. But not so with copper; the supply of that commodity cannot be controlled in any such way, as production is bound to go on at practically the same rate. Mining operations can not be suspended at pleasure without grave consequences or serious loss, hence the fluctuations in price as visible supply increases or diminishes."

BOX ELDER COUNTY TO HAVE NEW COURTHOUSE

Special to The Tribune.

BRIGLIAM CITY, Nov. 13.—Rumors are out to the effect that Box Elder county is to have a new courthouse in the very near future. Plans for the building are now being drawn by a local firm of architects and are to be finished in a few days. The plans show a magnificent structure, two stories and complete basement, making it practically three stories.

The building will be constructed on the government style. The frontage will be ninety-seven feet by fifty-four feet in depth, and will be built directly in front of the old building, which in the course of a few years will be razed and a modern wing built in its place to join onto the new building.

The basement of the proposed structure and each of the other floors will have a large corridor. The basement will contain offices for the sheriff and justices court, witness room and two or three large vaults. The first floor on either side of the corridor will have offices for the county clerk, copysist, district courtrooms, judges chambers and a library. The second floor will contain offices for the county and district attorneys, jury room, county commissioner's chamber and a large much-needed waiting room.

A balcony will extend over the front portico and the whole capped with a massive dome. The building when completed will cost in the neighborhood of \$37,500. It is most likely that bids will be called for before the end of the year, so that work will be commenced on the building the first of next year.

TWO HUNDRED FIFTY DIE IN GREAT MINE EXPLOSION

Continued From Page One.

vised hospitals and provided nurses and physicians for those who might be taken from the mine, but the preparations were needless.

The St. Paul mine is the only one in the town and provided employment for almost a thousand men.

It is owned by the Chicago, Milwaukee & St. Paul railroad, and is on a spur of that railroad, about fifteen miles from Spring Valley.

Chief Superintendent W. W. Taylor of the mine was not in the city when the accident occurred.

May Reduce Death List.
Later versions of the disaster given by miners who escaped placed the list of imprisoned in the mine at about 350.

It was declared that the fire had been burning more than an hour before it appeared dangerous. Before that time about 180 of the 565 men had quietly left the mine, it is said.

The twelve known dead whose bodies were recovered follow:
JOHN BURN, mine superintendent.
ALEXANDER NOBERG, pick manager.

THOMAS FLOOD, mine foreman.
ISAAC LEWIS.
JOHN FERMENT.
TWO UNIDENTIFIED BODIES.
JOSEPH YEABLY.
JAMES JAMISON.
JAMES SPEER.
HENRY STEWART.
ROBERT CLARK.

Practical miners who watched the work of rescue tonight asserted that it was almost impossible that any man could escape alive from the mine. The sealing of the shaft mouth, they said, while the only method of checking the fire, effectually shut off all air from the men while the fire and the smoke were forming noxious gases which would fill every section of the excavation.

Officials declared that air could reach the mine through the open escape shaft. No similar accident has been recorded in the history of mine disasters in Illinois.

Other Mine Disasters.
The greatest loss of life in any mine accident in this state occurred at Bradwood in 1879, when eighty men lost their lives. At Zeigler, Ill., fifty men have been killed in successive mine accidents. There are 150,000 men employed in Illinois mines and for the last fiscal year, 181 were killed in accidents and 800 injured. The greatest tragedy of mining history is believed to have occurred in Tokio, Japan, in 1907, when 470 persons were killed.

The maximum loss of life in a mine disaster in the United States was recorded at Monongah, W. Va., in 1907, when 398 miners were killed.

One of the miners who escaped from the Cherry mine, said tonight:
"The lights went out soon after the fire started and left everything in darkness. When the alarm of fire was heard there was a rush for the escape and main shafts, but comparatively only a few could be saved."

The smoke grew worse every minute. It will not be possible to save any of the imprisoned men."

The Mission

Of those corpuscles in your blood that have been called "Little Soldiers," is to fight for you against the disease germs that constantly endanger your health. These corpuscles are made healthy and strong by the use of Hood's Sarsaparilla.

This medicine is a combination of more than 20 different remedial agents in proportions and by a process known only to ourselves and it has for thirty years been constantly proving its worth. No substitute, none "just-as-good."

BIG DISTILLING PLANT DESTROYED BY FIRE

CINCINNATI, O., Nov. 13.—The immense plant of the Union Distilling company, known as the Edgemont Springs distillery, at Carthage, a suburb of this city, was almost completely destroyed by fire early today. The loss is estimated at between \$250,000 and \$300,000, fully insured.

The entire active plant of the distillery, with the exception of the bonded warehouse and the engine-house, were destroyed. There were numerous explosions and in one of these a fireman was seriously injured.

Runaways Caught.

Almost the first place George Cowlishaw, 11 years old, and Harold Grow, 12, unconsciously went to following their arrest here after running away from their homes at Ogden Saturday night to see the world, was the Salt Lake police station. Sergeant Beckstead observed them as they were passing the station and promptly picked them up and questioned them.

Their story that they were allowed to come here by their parents didn't impress the sergeant and he forced the truth from them. Then they were put in the boys' ward at the city jail and their parents notified. The runaways will be returned to Ogden today and probably turned over to the stern parental knee.

Cowlishaw lives at 194 Twentieth street, Ogden, and Grow at 508 Twentieth street.

STILL ANOTHER BOGUS CHECK COMES TO LIGHT

Another check, said to have been forged by Private Herman Villner of Company I, Fifteenth infantry, turned up late Saturday, making five bogus checks in all, amounting to \$118, said to have been uttered and passed by Villner.

The fifth check, for \$5, is dated November 8, and purports to have been drawn on the Utah National bank through John J. Jones. It bears the check number of 13,884. This check Villner gave Mrs. J. M. Nilsson of 372 South Main street in payment for meals for himself and his bride, who was Miss Oline Christ. When Mrs. Nilsson read the account of Villner's arrest in Saturday morning's paper she notified the police of the check in her possession. It is quite likely that Villner, who is quoted as saying that he passed the checks to get his bride money, wishes that the account of his wedding in a small paper published at Fort Douglas was true in its entirety. This paper has Villner and his bride in the southern part of Utah spending their honeymoon. Unfortunately Villner is spending his part of the honeymoon in the city jail.

PLAYER FATALITY INJURED: DIES IN FEW HOURS

WASHINGTON, Nov. 13.—Archibald Christian, of Richmond, Va., left half-back of the football team of the University of Virginia, was fatally injured in the last half of the game with Georgetown University here this afternoon.

Christian died in the Georgetown hospital at 3:30 o'clock this (Sunday) morning.

PROMINENT POLITICIAN SENTENCED TO PRISON

SAN FRANCISCO, Nov. 13.—Dr. G. W. Duinelle, a prominent citizen of Siskiyou county, this state, and a Republican presidential elector in 1908, convicted of conspiracy to defraud the government of public lands, was sentenced today by United States District Judge DeLaney to imprisonment for one year in the Alameda county jail and to pay a fine of \$1000.

Large Sum Is Paid for Sugar Beets

Special to The Tribune.

LEHI, Nov. 13.—The Lehi sugar factory on Monday will pay to the farmers of Utah, Sanpete and Sevier counties \$330,000 for sugar beets. Checks for the above sum were sent by registered mail to the several agents today and will be ready for distribution to the farmers on the morning of the fifteenth. Besides this large sum paid to the beet growers, the company, last Wednesday, paid over \$30,000 to their factory employees at Lehi and the cutting stations at Provo, Springville and Spanish Fork. The factory at Lehi and all the stations are literally swamped with beets, every shed being filled to overflowing, and huge piles are being stacked outside. In Sanpete and Sevier counties there are 11,000 tons stacked beside the railroad tracks awaiting cars to haul them to the factory. Besides this the farmers have 25 per cent of their crop siloed in their fields, and will haul them to the mill the latter part of December.

There has been a bumper crop this season, there not being a single locality of poor beets. The tonnage has not only been a large one, but the beets also run high in sugar, which will make this the banner year in the factory's history, so far as the output of sugar is concerned. Because of the unparalleled weather during the past month, less than 10 per cent of the crop remains in the ground, and a week more will see the entire crop harvested. The

factory continues to grind over 1000 tons of beets each twenty-four hours, but, owing to the immense crop, run will continue into the latter part of January. Of the 2500 bags of sugar being sacked daily, much of it is being sent to Missouri river points, some is going to Utah merchants, and the balance is being stored in the big warehouses at the factory.

Eugene Roberts, formerly head machinist at the Lehi sugar factory, is in Lehi today installing some attachments to the evaporators which he formerly installed in the centrifugals in the Lehi factory. The invention was patented by Mr. Roberts, who is now general manager of a corporation organized to exploit his invention. He has just returned from Grand Junction, Colo., where he installed one of his improvements, and will leave next week for California, where he will install several in the factories there. As soon as Mr. Roberts completes his work in California he will go to Louisiana, and from there to Europe. His evaporator, besides increasing the capacity of each centrifugal, will mean the saving of work that is now done by from fifteen to forty men in every sugar factory in the world.

Card of Thanks.
We deeply appreciate the kindness and beautiful floral offerings of the boys of the Ohio Copper company, Modern Woodmen of America and friends, in our sad bereavement.
MRS. HARRY LAYNE AND FAMILY.

A CHAMPION QUARTERBACK

The above picture shows the three-year-old son of Mr. and Mrs. W. B. Throckmorton, who reside at 190 S street. Mr. Throckmorton is traveling freight and passenger agent of the Colorado Midland railroad.

REGISTRATION FEE INCREASED.

An increase of two cents is to be made in the near future in the fee for the registration of letters and mail packages and it is the general opinion that same will not be opposed when it is understood that the government is losing thousands of dollars through the present system. It is always a wise plan to guard against loss of any kind and this is more particularly so in regard to your health. When you notice any signs of failing health resort to Hostetter's Stomach Bitters immediately and help Nature to restore things to a normal condition again. It is particularly well adapted for this work and never fails. Try a bottle today for Poor Appetite, Heartburn, Belching, Bloating, Indigestion, Dyspepsia, Costiveness, Biliousness, Colds, Grippe and Malaria, Fever and Ague. At all Druggists. Refuse all substitutes and imitations.

FORMER SALT LAKE LAKER WELCOMED BACK

MRS. ARCHIBALD E. RYKERT.

MACK RYKERT.

MURRAY

Special to The Tribune.

MURRAY, Nov. 13.—The college club held a pleasant meeting Friday evening at the home of Miss Laura Burneimer. Some names were proposed, to be voted upon at the next meeting. There was some talk of revising the constitution, but nothing definite was done.

Mrs. Helen France of Bonafid, a Murray visitor for some time, will return home this week.

The general board of the Granite stake primaries entertained the local officers Thursday afternoon in the stake house. The affair was the first of its kind this season. Dancing and luncheon were the features of the afternoon.

Mrs. Charles Franks entertained the Thimble club Thursday afternoon. The affair was turned into a housewarming, as it was the first meeting in Mrs. Franks's new home. The living room was decorated in purple and white, chrysanthemums, and the dining room in yellow and white.

Blanche Drinkwater, daughter of Mr. and Mrs. J. E. Drinkwater of this place, and Ray Arnold, were married Wednesday. The young folks will make their home in Murray.

Frank Pearson and Will Johnson arrived in Murray this week from Grand Junction, where they have been spending the past three months on a ranch. The men will leave Murray Monday for Logan, to enter the Agricultural college.

Miss Alice K. Jones of Blackfoot is here to spend a week or more with her sister, Mrs. C. J. Overman.

Mrs. Mary S. Fowler of Huntington is here visiting her sons, David A. and W. R. Fowler, who have charge of the manual training and art works of the Murray schools.
